

EDUCATORS BRAVE SEVERE WEATHER TO HEAR ADDRESS

(Continued From First Page.)

The discovery of its tap root cause— if we can find it—there is any such thing. Socialists find it in exploitation. Antisocialists, when they have a clear-cut philosophy on the subject, are apt to find it in economic inefficiency. Being neither a socialist nor an antisocialist, but an impartial student of social economy, the editor of the Times-Dispatch is constrained to combine the two partial explanations into one which I think really does explain the larger part of our poverty. It is, in the exhibition of the exploitable, the underpay of those who can be underpaid; the overwork of those who do not know how to secure leisure; the lack of protection of the unorganized; the cultivation of commercial profit of vicious habits; of depraved appetites, of human weaknesses; the play of unrestrained greed upon individuals who do not have resisting power as individuals and whose conduct is latent in the power in the form of social control has never been brought into effective counter play.

The Goal of Education.

"The school itself is the natural organizer of the knowledge which it imparts. Or rather the imparting of knowledge and its application to social ends should not be two processes, but one. If the organization of knowledge for the common good does not take place deliberately with its acquisition, it does not take place at all or it takes place only partially and at excessive cost. The assumption of social responsibility for poverty, disease and crime clearly involves the transformation of the school into the foremost instrument of social economy. This is not merely to tack a new label on an institution already sufficiently labeled. On the contrary, it means something. And what it means is, first, a different training of teachers; second, a new curriculum, and third, more vital and diversified contacts between

Men Welcome

Mother's Friend

A Duty that Every Man Owe to Those Who Perpetuate the Race.

It is just as important that men should know of progressive methods in advance of motherhood. The suffering incident to child-bearing can be easily avoided by having at hand a bottle of Mother's Friend.

This is a penetrating, external application that relieves all tension upon the muscles and enables them to expand without painful strain upon the ligaments. Thus there is avoided nervous spells, the tendency to nausea or morning sickness is counteracted, and a bright, happy disposition is preserved that reflects wonderfully upon the character and temperament of the little one soon to come. You can obtain a bottle of "Mother's Friend" at any drug store at \$1.00. It preserves the mother's health, enables her to make a complete recovery, and thus will renew strength she will eagerly devote herself to the care and attention which so much to the welfare of the child. Write to the Bradfield Regulator Co., 223 Lamar Bldg., Atlanta, Ga., for their valuable and instructive book of guidance for expectant mothers.

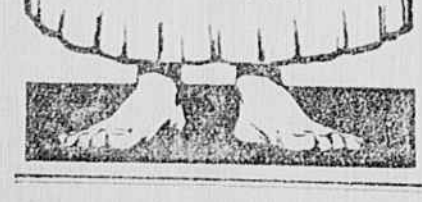

Rheumatism is the most distressing and discouraging of all troubles. Nine cases out of ten can be cured by using

Noah's Liniment

Where there is no swelling or fever a few applications will relieve you. Noah's Liniment penetrates and requires very little rubbing. Liberal sample and interesting booklet mailed for 4c in stamps to cover postage.

the school and the adult community.

It is fortunate that our generation is inclined to formulate the task of education largely in economic terms, in terms of earning and spending, of productive efficiency and standards of living. Those are no ignominious or purely quantitative terms. It is a misinterpretation of this tendency to say that it is for the advantage of industry.

"The demand is made not in the interests of industry, but in the name and in the interests of education. If we can increase by 50 per cent the earning capacity of the boy who enters industry, we shall make him relatively independent of his employer. If he becomes worth \$4 a week at the start—instead of \$2.50 a week—he becomes by the same educational process worth \$12 a week to himself. I am far from suggesting that earning capacity at the moment of leaving school is the only or even the best test of the efficiency of the schools, but it is a very definite test, and one from which the exponents of modern ideas in education should not shrink. Men and women who are apt to do the work of the world, and who are keen to appreciate in due proportion the fruits of industry, capable workers and discriminating ultimate consumers, producers of wealth—i. e., of well-being and rational users of wealth—these are the goal of education as the social economist would formulate it, asking from the schools not everything, but a generous slice of that large everything which social welfare consists of."

United States Commissioner of Education P. P. Claxton, who arrived in the morning, came in, and was invited to the rostrum. He was received with applause.

About 2,500 visitors here.

Dr. Chandler announced in an interim that thirty regresses from the Whitlock Tobacco factory had been engaged to sing Southern airs for the educators at 7:45 o'clock to-night. The time is set fifteen minutes earlier, so as not to interfere with the program, which will begin promptly at 8 o'clock. Dr. Chandler announced also that the John Marshall High School Chorus, missing last night, would sing in the high school at 9:30 o'clock this morning, and invited all the delegates to come and hear the singing.

A joint resolution from the General Assembly, welcoming the National Education Association, and inviting its members to visit the legislative halls at any time they desired, was read and unanimously adopted.

The actual registration made yesterday showed that there were 1,500 delegates present. As the American Association of Collegiate Registrars, which is also meeting here, does not register with the National Education Association, and as many women are not registered, the actual number of visitors is nearly 2,500. Secretary Joseph H. Saunders has had some difficulty in finding room for all the delegates, for the hotels are filled and some of the visitors have been turned away.

Attention was called to the fact yesterday that the elementary school exhibits are being shown in the John Marshall High School, and the exhibits of colored schools are being displayed in the Armstrong High School (colored). Commercial exhibits are on display in Murphy's Hotel Annex.

At a meeting of the National Council of Education at the Jefferson Auditorium yesterday afternoon, Charles S. McKim, superintendent of schools in Boston, Ind., advocated that the public school system be examined by experts in education so that the general public may know what is being yielded by the expenditure of approximately \$100,000,000 annually for education. He said a committee of examination, he said, would set forth clearly what phases of administration, curriculum and instruction are to be eliminated, what to be emphasized and what to be added. He thought that the report of such a committee would be the most effective device to convince the public that the enormous sums the schools are each year exacting are being wisely and economically expended, and are yielding commensurate returns in terms of education.

Declaring that parents have duties and responsibilities which cannot be delegated to others, John W. Carr, superintendent of schools in Bayonne, N. J., stated at the same meeting that he was opposed to the direct teaching of sex hygiene in the public schools. This knowledge, he said, "should be imparted at a time when it is most needed, and in a manner which will be most effective. The fact that many parents neglect or are unable to give this instruction is no reason why the school should undertake it. There should be a general understanding to the effect that the school cannot and should not be expected to do all that needs to be done for children." He said that the teaching of this subject inevitably leads to morality.

Indirect instruction. "What seems to be the sanest and best scheme of instruction for the public schools," he continued, "may properly be called a scheme of indirect instruction."

Most Popular Railroad Conductor

The Times-Dispatch Voting Coupon

A Solid Silver Lantern will be given by The Times-Dispatch to the most popular Railroad Conductor running into or out of Richmond.

I hereby cast one vote for

LEADING IN CONTEST

CONDUCTOR J. T. CANADA,

of the Southern Railway Company, who is leading in the race for the Silver Lantern offered by The Times-Dispatch to the most popular Railroad Conductor running into or out of Richmond.

struction. The atmosphere of the school is clean and wholesome. Purity and cleanliness are stressed. The spirit of chivalry is developed. The will is strengthened. The instinct of shame is guarded. Motor activities,

such as manual training and vocational occupations, are carried on. Strong and abiding interest in things worth while are aroused. Courses are given in the high schools in botany, dealing with flowers and fertilization, followed later with courses in biology. Such instruction paves the way to the proper understanding of sex, and such training develops purity and wholesome living. Such instruction and training I most heartily approve, and I believe it will meet public approbation also.

In the general discussion which followed, T. A. Mott, superintendent of schools in Seymour, Ind., said "our instruction in race hygiene must consist of much more than knowledge of hygiene and the laws of biology. It must seek to develop in the children a spirit of altruism. A true reverence for motherhood and a deep love for little children will do more to inspire noble, pure living among youth than the fear of the ravages of disease. The problem includes the development of right attitudes of mind, of high ideals and ethical standards of life, respect for the social standards and conventions of society, and appreciation of the sanctity of the home. He said that in grades above the sixth, the boys should be separated from the girls, that the boys should have a male teacher, preferably a father, and the girls a woman teacher.

CARE FOR YOUR HAIR

CUTICURA SOAP

And Cuticura Ointment. They cleanse the scalp, remove dandruff, arrest falling hair and promote hair health when all else fails.

Cuticura Soap and Ointment sold throughout the world. Liberal sample of each mailed free, with 22-p. book. Address "Cuticura," Dept. 771, Boston.

Tired Blood

Election of officers. 2 P. M.—Grace Street Baptist Church: "Aids in the Simplification of Routine Record Work."

"The Proper Number and Compensation of High School Assistants." Arthur W. Tabbell, registrar, Carnegie Institute of Technology, Pittsburgh, Pa.; M. M. Toms, University of Illinois, Urbana, Ill.; Max W. Clark, University of Vermont, Burlington, Vt.

Business meeting.

I and I hope there will always be that difference. The mother lives more with the child than does the father, and she knows more about the joys and sorrows and difficulties that cannot be known by the father, who, during the day, is away from home attending to his business."

Mrs. Young spoke of the fact that the child has to deal with the life of the most valuable creature on earth—the future men and women.

The Chicago women, she said, did not believe they should have anything to do with the primaries, the selection of candidates, the election of men for one party or another. They prefer to wait until the candidates are nominated and then they vote for the men that seemed to them best suited for the position.

They were not so anxious that the Democrats win, or the Republicans or the Progressives; but they want to out what these people stand for. They categorize the nominees of the different parties until they know what each man represents. In time they may get into party organizations.

"We hear so often that women do

not know anything about teamwork, party organization," said Mrs. Young.

"I myself had determined not to register until the next registration, having been informed that in this registration I would have to decide upon my party, but fearing that the women might fall short in numbers, I did register and did not, after all, have to declare for any party."

REGISTRARS MEET

American Association in Session at Grace Street Baptist.

The American Association of Collegiate Registrars began its fifth annual session here yesterday morning. This association is connected only indirectly with the National Education Association, and does not register with the latter body. The officers are: President, E. J. Matthews, registrar of the University of Texas; vice-president, W. D. Foster, registrar of the University of Kansas; secretary, Miss Mary Scott, registrar of Knox College, Galesburg, Ill.

President Matthews announced the following committees: On nomination, E. A. Espenbush, of Pennsylvania State College; Charles E. Barr, of Albion College; and Howard Winston, of the University of Virginia. On registration, J. A. Gannett, of the University of Maine. On auditing, Walter Humphreys, of Massachusetts Institute of Technology and Elven J. Benbough, of McMaster University.

President Matthews announced the following committees: On nomination, E. A. Espenbush, of Pennsylvania State College; Charles E. Barr, of Albion College; and Howard Winston, of the University of Virginia. On registration, J. A. Gannett, of the University of Maine. On auditing, Walter Humphreys, of Massachusetts Institute of Technology and Elven J. Benbough, of McMaster University.

President Matthews announced the following committees: On nomination, E. A. Espenbush, of Pennsylvania State College; Charles E. Barr, of Albion College; and Howard Winston, of the University of Virginia. On registration, J. A. Gannett, of the University of Maine. On auditing, Walter Humphreys, of Massachusetts Institute of Technology and Elven J. Benbough, of McMaster University.
